

GENERAL INFORMATION

Multi-purpose, shallow-draft symmetrically hulled catamaran. The high buoyancy reserves of the forward sections offer excellent sea-keeping capabilities, particularly in a following sea.

Twin Scania 750hp engines and water-jet propulsion provide excellent manoeuvrability, good performance (22kn) and low fuel consumption (200l/hr). The aft superstructure suits construction and O&M roles, with a large forward working deck and crane for self-loading from quayside, with all cargo secured forward for easy transfer to transition pieces.

1.5m significant wave transfer capability.
